

# WE need to take more English classes

We has a several meaning, I think it has a million of meanings but the ones that are familiar to me are we as a pronoun and the other we that I'm going to talk about.

We, who are we? It is very simple, it is me, you and the others, that is, we the total <sup>living</sup> humanity ~~leaving~~ on this earth.

what?

I think it is already the time to think about it "we" because the rhythm that we are leading does not promise a good future for our children, with a population close to six billions individuals we have really to think about it, can we just imagine and think as John Lennon did, imagine one world that we can live in ~~it~~, in prosperity and peace?

Our mother "nature" <sup>provide</sup> offer ~~for~~ us daily tons of food, all sort of resources, fresh air to breathe and all our need, and in <sup>return</sup> change to be <sup>grateful</sup> grateful we ~~distract~~ <sup>either destroy or distract?</sup> her, we are rude

to her and we are killing her slowly. But one day we will regret it because of all <sup>that</sup> what we cause <sup>for</sup> her. One day will <sup>come</sup> come and she will take revenge <sup>for</sup> of all the ocean that we polluted, CFCs that we produced, her childrens <sup>and</sup> ~~Animals~~ <sup>Capitalized</sup> Animals that we exterminated, lands that we damaged, it will be a Judgement Day, that <sup>not</sup> God will be the judge and "we" ~~we~~ will be the guilty killers, a trial without a lawyer because there is no evidence to hide, the crime is clear.
